Welcome

Dear Colleagues and Friends,

It is a great honour for us to host the 4th meeting of the International Conference on Human Brain Development (ICHBD2019). On behalf of the Organizing Committee of ICHBD2019, we are pleased to welcome all of you to the conference in Hangzhou, Zhejiang, China.

ICHBD2019 is co-organized by the Institute of Psychology, Chinese Academy of Sciences, Biophysical Society of China and Hangzhou Normal University, and hosted by Hangzhou Normal University. This year, we will be focusing on the developmental population neuroscience.

Hot topic sessions will focus on healthy brain development, reproducibility, clinical translational applications, lifespan development, neuroimaging of brain and behaviors. The goal of this conference is to bring together international scientists from a range of disciplines to focus on the identification of challenges and solutions for the advancement of developmental neuroscience.

Research on human brain development in China is growing rapidly both in volume and quality. We hope that this meeting will showcase the growing body of research across a wide range of disciplines pertinent to the above theme in China, and build a communication bridge for researches between China and the world.

This conference will be an excellent opportunity for all participants to meet with lead researchers in human brain development. We would like to engage with all of you in an open and constructive dialogue about human brain development. We truly believe this will be a highly rewarding international festival for every one of the participants and will help us to better understand the bases of human brain development.

We wish you two fruitful days and looking forward to seeing you in Hangzhou, Zhejiang, China.

Xi-Nian Zuo

Co-Chair, ICHBD2019
